

FIG. 1

FIG. 2

FIG. 3 is a perspective view of the first embodiment of the present invention, showing a cross-section of a container with a lid and a base. The lid is shown in a partially open position, revealing the interior of the container. The base is shown in a partially open position, revealing the interior of the container. The lid and base are both made of a material that is resistant to heat and cold, and they are both designed to be easy to use. The lid and base are both shown in a perspective view, and they are both labeled with the number 12. The lid is also labeled with the number 14, and the base is also labeled with the number 14. The lid and base are both shown in a perspective view, and they are both labeled with the number 12. The lid is also labeled with the number 14, and the base is also labeled with the number 14.

FIG. 3

FIG. 4

FIG. 5

FIG. 6 is a top view of the device 100 showing the grid 23 and the pattern 25.
